Surveillance

Enabling Secure, Scalable & Intelligent Digital Infrastructure

ABOUT

Technopop Solutions Pvt Ltd is a next-generation technology partner helping enterprises and government organizations build secure, resilient, and future ready digital ecosystems.

We specialize in delivering integrated solutions across Governance, Risk & Compliance (GRC), Datacenter & Cloud, Cybersecurity, and Surveillance systems, ensuring a unified approach to digital transformation.

Our strength lies in combining infrastructure, security, and compliance into a single delivery framework bridging the gap between operational efficiency and regulatory

From designing modern cloud environments and securing critical assets to enabling real time surveillance intelligence and compliance frameworks, we act as a single strategic partner

Design

Deploy

Secure

Monitor

Optimize

With a strong focus on enterprise and public sector requirements, our solutions are aligned with evolving standards including ISO 27001, DPDP, RBI, and CERT In guidelines.

CORE CAPABILITIES

Digital Infrastructure

Cybersecurity & SOC

Cloud & Managed
Services

Physical Surveillance

GRC & Compliance

Microsoft
Services

DIGITAL INFRASTRUCTURE

DATA CENTER | NETWORK | RESILIENCE

CLOUD & MANAGED SERVICES

AZURE | HYBRID | 24X7 OPERATIONS

CYBERSECURITY & SOC

DETECTION | RESPONSE | PROTECTION

PHYSICAL SURVEILLANCE

CCTV | COMMAND CENTERS | AI INTELLIGENCE

GRC & COMPLIANCE

GOVERNANCE | PRIVACY | RISK

MICROSOFT SERVICES

LICENSING | PRODUCTIVITY | OPTIMIZATION

DATACENTER & CLOUD SOLUTIONS

Datcenter & Azure Cloud Solutions

Cloud-first infrastructure built for scale, security, and performance

We enable organizations to transition from traditional infrastructure to cloud-first, Azure-powered ecosystems designed for agility, resilience, and secure digital operations.

Our approach integrates Azure cloud capabilities with modern datacenter foundations, ensuring seamless hybrid environments that support evolving business needs.

Core Capabilities

- **Azure Cloud Architecture & Deployment**
Secure landing zones, subscription design, governance, and workload deployment
- **Cloud Migration & Modernization**
Lift and shift, re-platforming, and cloud native transformation
- **Hybrid Cloud & Azure Virtual Desktop (AVD)**
Seamless integration of on-premise and cloud environments with secure remote
- **Cloud Security & Monitoring**
Microsoft Defender, Sentinel, and native security controls
- **Datacenter Modernization & DR**
HCI, backup, disaster recovery, and high availability architecture
- **Microsoft Solutions**
Licensing | Productivity | Optimization

What We Deliver

We design and operate Azure centric infrastructure ecosystems that combine scalability with enterprise grade security.

Our solutions enable:

- Rapid deployment of cloud workloads with built-in governance
- Secure hybrid environments with centralized visibility
- Optimized cloud consumption and cost control
- Business continuity through resilient backup and DR strategies

The outcome is a secure, scalable, and cloud optimized infrastructure that accelerates

GOVERNANCE, RISK & COMPLIANCE (GRC)

Building trust through structured governance and regulatory alignment

We help organizations establish robust governance frameworks and compliance readiness, ensuring alignment with regulatory mandates while minimizing operational risk.

Core Capabilities

DPDP Act Readiness & Data Privacy Frameworks

ISO 27001 Implementation & Certification

Risk Assessments & Control Design

Policy Development & Compliance Audits

Third-Party Risk Management

The outcome is not just compliance but sustained governance maturity and operational confidence.

What We Deliver

We design and implement end to end compliance frameworks that integrate seamlessly with business operations enabling organizations to move from reactive compliance to proactive risk management.

Our approach ensures:

Clear visibility into risks and controls

Audit-ready documentation and processes

Strong data protection and privacy posture

Cybersecurity Solutions

Proactive protection in an evolving threat landscape

We provide comprehensive cybersecurity solutions that enable organizations to detect, prevent, and respond to threats in real time, ensuring business continuity and regulatory compliance.

Core Capabilities

SOC Setup & Management

Adversarial Simulation & VAPT

Threat Protection & Incident Response

Data Security & Emerging Risks

Identity & Access Security

Email & User Awareness

Cybersecurity That Works

We deliver intelligence-driven security that ensures visibility, rapid response, resilience, and compliance across industries.

Our Approach

We combine compliance-first frameworks with operational defense to deliver measurable security outcomes:

- ✦ **Integrated** – aligning cybersecurity with cloud and GRC strategies
- ✦ **Adaptive** – tailoring defense to industry regulations and emerging risks
- ✦ **Proactive** – simulating adversarial attacks to stay ahead of threats
- ✦ **Resilient** – enabling rapid response and recovery with tested playbooks
- ✦ **Accessible** – simplifying complex security for executives and endusers

SURVEILLANCE SOLUTIONS

Surveillance & Smart Security Solutions

From monitoring to intelligent situational awareness

We design and deploy advanced surveillance systems that go beyond traditional monitoring enabling real time intelligence, analytics, and centralized control.

Our Capabilities

- Enterprise CCTV Surveillance Systems
- Command & Control Center Setup
- I3C (Integrated Command & Control) Platforms
- AI-based Video Analytics (Facial Recognition, ANPR)

What We Deliver

We build intelligent surveillance ecosystems that integrate physical security with digital analytics enabling faster decision making and improved response.

Our solutions deliver:

- Centralized monitoring and control
- AI-driven insights and anomaly detection
- Scalable systems for enterprise and smart city use cases

The outcome is enhanced security through visibility, intelligence, and real-time action.

LET'S BUILD SECURE DIGITAL FUTURE

We partner with organizations to design, secure, and scale their digital infrastructure—delivering solutions that are both technically and strategically aligned.
